

LAND OF THE

GIANTESSSES

When The Smiths recorded 'Some Girls Are Bigger Than Others', they could never have imagined how poignant that song would become when featured in *Bizarre*. Meet the giantesses who eat, smother and crush their victims, and the men who worship them...

People crave partners in all shapes and sizes. Tall, round, petite or waif-like, there's a body shape for everyone. But when your thing is for a 50ft giantess with a lust for stuffing men down her XXXL panties, the chances of finding a date on Match.com are pretty remote.

"At school I had a crush on a Goth girl in my class, and fantasised about what it would be like being her 6in tall pet," coos 30-something James, a 'giantess' fetishist →

Isabelle Shy:
50ft of pure,
skyscraper-
toppling sass

from the Midlands, UK. "I imagined being held in her hand or climbing up the laces of her boots. I've always had an interest in femdom, and a fetish for girls in boots - so my ultimate fantasy would be a giantess dominatrix in thigh-highs!"

SIZE REALLY MATTERS

A sexual attraction towards giants, most commonly female giantesses (GTS), is known as 'macrophilia'. Macrophilia fantasies can range from being scooped up and gently caressed in massive hands, to simply being able to admire the female form on a larger scale. Some kinksters get turned on by seeing a woman growing in size, or by the fantasy of shrinking themselves to the size of a peanut (a sub-fetish known as 'shrinking man'). But many giantess fans also crave grisly, fatal outcomes, where they (or others) are crushed between grinding gnashers, or squished like measly bugs. The fantastical nature of the fetish means it's almost exclusively indulged through stories, art, comics, online role-play and fantasy videos. But for the tens of thousands with a thing for colossuses bitchslapping Godzilla, there are a few great sites catering to their epic tastes.

"Some fans love to see me eat my 'pets', either by biting and chewing them (known as 'hard vore') or by sucking, licking and swallowing them whole ('soft vore')," says breathtaking giantess model, Isabelle Shy, who runs the site IsabelleShyGTS.com. "Others like point-of-view (POV) videos so that they can see exactly what it would be like to belong to me. 'Unaware' fetish is where I either don't care about the tiny man beside or beneath me, or I simply don't see them. And many fans love the booty crush aspect, where I sit on them, press my ass against them, smother them, and even kill them."

Based in New York, the feisty Isabelle makes videos with story lines tailored to macrophiliac desires, where she teases her human pets in a variety of lurid scenarios. In the video *Fantastic Vorage*, she shrinks a friend so that they can pilot a miniature ship through her digestive tract, from throat to stomach. In the custom video *Good Morning*, her boyfriend wakes up to

discover that Isabelle has shrunk him. "I make him rub My feet, hold him in My hands, and finally stuff him in My thong to sit on him!" grins Isabelle, who insists on her possessive being capitalised to emphasise her 'godly' status.

But Isabelle is not alone in her bid to conquer our frail and miniature earth. Standing at God-knows-how-tall (in our kinky imaginations, anyway), Giantess Katelyn (AKA Katelyn Brooks) is another super-sexy gargantuan who gets a kick out of tormenting minuscule victims. Membership to her site GiantessKatelyn.com lets you ogle the US beauty's flawless form on an unbelievable scale.

"My fans are crazy about my mouth and feet, and tell me how they want their lives to end by being swallowed whole or crushed under my curvy bare soles," she says. "Some of the hottest fantasies I've made as custom videos came from one fan, whose fantasies involve me squishing, eating, fucking and crushing dozens of shrunken people all over and in my body. I use scale figurines for most of my stuff, of course!"

CRUSH THE BUGS

While some fetishists prefer their enormous female fantasies to be kind and gentle, it's more common to find crossovers between femdom kinks and macrophiliac scenarios because of the formidability and power a giantess possesses. For example, Londoner Nick says that being dominated by a 20ft tall Amazonian warrior would be his ultimate fantasy, where he has to relinquish all power and accept his fate.

"Macrophilia is all my existing fetishes, such as foot domination, multiplied to the power of ten," says the 35-year-old submissive eagerly. "For me, I imagine a large foot, bare or in nylons, teasingly pressing down gently, slowly pinning me to the floor. I'd be entirely at the mercy of my towering captor, who giggles as she plays with this pathetic loser. I love being smothered by female feet in real life, and I can only begin to imagine what the aroma of a giant, sweaty foot would be like, as its intoxicating fumes flow into my nostrils. It would be scary and exhilarating, the ultimate act of cruelty."

"MANY FANS LOVE MY BOOTY CRUSH AND WANT ME TO SIT ON THEM"

ISABELLE SHY

Nick says his giantess fantasies evolved in his teens, and rekindled the strange, alien impulses he first felt as a kid watching films such as the 1976 *King Kong* remake and *Time Bandits*, which features a brief giant scene. "In *King Kong* I remember the ape storming through the city and leaving these bizarre little splatters of dead people," he says. "Years later I recall watching the *Attack Of The 50ft Woman* remake and hoping its star, Daryl Hannah, would do the same, treading on lots of people in glorious close-up. Sadly, I don't think she did, but it certainly put my imagination into overdrive."

Nick says he also enjoys wrestling and trampling fetishes - where women literally walk all over men - but he says the thrill of macrophilia is that it allows giantess devotees to suspend their disbelief. "I find the fantasy can be shattered when you see femdom videos where the guy being trampled is much larger than the female in control," he says. "With giantesses, it's never like that. The guy could be built like Arnie, but he'd still be at the mercy of a much stronger adversary. It's the ultimate surrender, isn't it?"

Over in the US, trample fan Jason Ninja produces and stars in videos for the leading fetish studio BrattyFootGirls.com. Yet despite their focus on regular foot domination starring sexy, normal-sized performers, his studio is besieged with requests for giantess material. "It's close to being my number one most requested fetish for custom orders," says Jason who, due to popular demand, has been shrunk to miniature scale for numerous storylines. "The giantess fantasy can be appealing to those who are into the idea of being crushed under women's feet. It really is the ultimate end for people with that fatal wish."

Jason's says the best giantess video he's shot is *The Top Secret Potion* which stars Katelyn, a performer he describes as 'legendary' in the fetish business. But Jason admits that, even with star performers and an imagination the size of a planet, implementing giant-sized special effects can be a ballache. But he's done a sterling job so far...

"Katelyn and I shot some fun videos together, and I'm proud of the first special effects clip I did with her," he says. "I'm still kind of new to the techniques, so I try to keep my green-screening (where actors are superimposed onto different backgrounds) as simple as possible. Other producers can take months to finish one video. You have to pay attention to so many factors to make a giantess video look realistic. It can be a nightmare!"

EVERYTHING MUST GROW

But while macrophiliacs get a thrill from encountering a towering giantess, both Isabelle and Katelyn are equally turned on by their towering roles, a trait that shines through in their mischievous work. Similar to how macrophilia expands on Nick's submissive tendencies, Isabelle also considers the fetish to be a natural progression from her own interests in female domination. "My love of femdom fits the giantess fetish like a warm, soft leather glove," she purrs. "My other fetishes include foot worship, ass worship, shoe and boot worship, pantyhose fetish and BDSM, which all suit the multifaceted role of being a giantess." →

WEB OF GIANTS

Want more? Here are a few other great sites catering for fans of giantess fetishes...

GiantessFan.com

Members' site producing erotic comicbook stories, sometimes with recognisable faces from popular culture. The excellent art is produced by pros.

Giantessgirls.com

If you like high-quality POV shots of sexy women reaching down to grab you, or squish you with a giant, well-manicured foot, this is a good place to visit.

TinyFetishFun.com

Brilliant British site where glamour models eat, squash and breast-smother tiny victims. Features weekly high definition video updates. Highly recommended.

MODEL: CHARLEY ATTWELL

GiantessCity.com

A forum for macrophiliacs across the world to share stories, experiences and art, well as role-play online. It's the ultimate stop for little people.

GTSArtists.com

Dubbed 'where your fantasies meet art', this site is filled with comics, art, artists' blogs, and covers other related fetishes such as female growth.

COLOSSAL COMICS, DUDE!

As part of our exploration of macrophilia we spoke to Geo, one half of the US-based comicbook site **Giantess Fan Comics** (GiantessFan.com), who commissions professional artists to bring their tower-topping stories to life.

How did you and your working partner, J Yubari, get into doing giantess art?

We've always been into giantess art. Many people into GTS notice they were into it even before puberty. We felt that there was a lack of professional quality GTS art, and the rest is history.

Do you produce full comicbook series that fans can download and read?

We mainly produce full comic book series. Some of the comic scripts are written by us, while others are collaborations with other writers who are into giantess themes. The one-off images are free commissions rewarded to members.

What are some of your favourite storylines that you have written?

My favourite story is *Don't Eat Me*. It's about a Japanese schoolgirl in proper attire, living out her

fantasies of eating shrunken students. I don't produce the artwork – we leave that to the professionals.

Which art on your site has been the most popular?

The art that seems to be most popular is fan art of well known comicbook and videogame characters. Here's one with Catwoman and Batman: Giantess-fan-comics.deviantart.com/art/Giantess-Catwoman-vs-Batman-343581657. There are wide range of tastes within the giantess niche. Some like crushing, others like gentle fantasies. We try to cater to most of them.

Experts might argue that, given the role reversals – with Isabelle in the guise of playful colossus rather than small person – her kink might be termed ‘microphilia’, which refers to a sexual fascination with tiny folk. But whatever the correct terminology, the two fetishes go hand in hand and, like Nick, both Isabelle and Katelyn can trace their interests back to a time when play and fantasies were far more innocent.

“As a child I spent hours building massive cities in My mother’s family room,” says Isabelle. “I’d then populate the city with My army men, carefully placing each in just the right place. Then, after all the preparation and anticipation, playtime could begin. I would approach the city proudly, view each building, each inhabitant, and I would then proceed to destroy everything. I’d kick over the skyscrapers, stomp on the houses. I’d send all the inhabitants to certain death.”

Katelyn recalls having similar fun as a kid: “The giantess thing is something I’ve personally fantasised about from a young age, starting with *Tom And Jerry* cartoons,” she says. “I’d feel mesmerised by the predator and prey chase with a dramatic size difference. I’d also pin my dolls and toys underfoot and crush them in every way possible, making for a sexual adrenaline rush I didn’t fully understand until I was much older.”

THE REAL THING

But can giantess fetishes ever be indulged in anything other than fantasy art and special effects videos? Or are there more interactive games to be played? While some deviants might like to be lifted, squashed or do height comparisons with real-life Amazonian women – such as the often-touring 6ft 3in Amazon Amanda ([Twitter.com/AmazonAmanda](https://twitter.com/AmazonAmanda)) – James says that the fetish involving women beyond human size tends to remain imaginary. But, that said, with a strong suspension of belief, there have been a few times when giantess role-play has crept (or stomped?) into James’ bedroom...

“I’ve played out macrophiliac fantasies with girlfriends in the past, with them standing over me, telling me what they’d do to me if I was tiny,” reveals James. “One girl used to like to tie me down, then either sit on me or rest her boot on my chest while telling me what she’d do if I were only a few inches tall. I’ve also done online role-play, both with girls I know and complete strangers. It could range from sending texts to each other, or messaging each other online via Facebook. Sometimes I’ve written stories for them to read, as I like the idea of women reading my fantasies.”

Jason Ninja says that, for macrophiliacs who want to imagine themselves in the role of victim, POV images and videos tend to provide the ideal solution, and sites such as GiantessGirls.com and TinyFetishFun.com are a great place to visit. “They are the closest thing you’ll ever get to living out the fantasy,” he says. “Others who are more into physical foot crushing might be more inclined to want to get trampled by taller, bigger women. I know a lot of women, such as Amazon Amanda, make a killing doing sessions with guys who are after that sort of thing. If I was a 6ft 6in woman, I’d be all over that in a second!”

“AS A KID I LOVED BUILDING MASSIVE CITIES AND DESTROYING THEM!”

ISABELLE SHY

Although she says she never engages in physical role-play with Her fans, Isabelle says She enjoys doing online role-playing sessions using giantess scenarios, which She offers through Her website. And because such play allows its imaginative participants to push things to extraordinary heights, things have been known to get rather thrilling for both parties...

“After one steamy Skype session I was inspired to film the video titled *Patrick’s Playtime*,” recalls Isabelle. “The fan was quite into the foot worship aspect of the giantess / shrunken man fetish, so I pressed My foot against the camera where it sat on the table, telling him how I would make him lick every inch, rub every part, and worship My feet until he was exhausted. I was so aroused – I wanted it to be true as much as he did. It was amazing. Let’s just say that it was a happy ending for all!”
